Online Test Summary			
Subject	sms-		
Max. Marks	60	Score	-
Certification Course Summary			
Course	Machine learning		
Certificate Provider	AWS	Duration	10-2.30
Coding Challenges			
Problem Statement- : 1. 1. Python Program to Count the Number of Blank Spaces in a Text File			
Status: completed			
Uploaded the report in Github		yes	
If yes Repository name		Sheeri - Shetty -	
Uploaded the report in slack		yes	

Online Test Details: (Attach the snapshot and briefly write the report for the same)

Certification Course Details: (Attach the snapshot and briefly write the report for the same)

Coding Challenges Details: (Attach the snapshot and briefly write the report for the same)

Coding was given and it was uploaded for github and slack

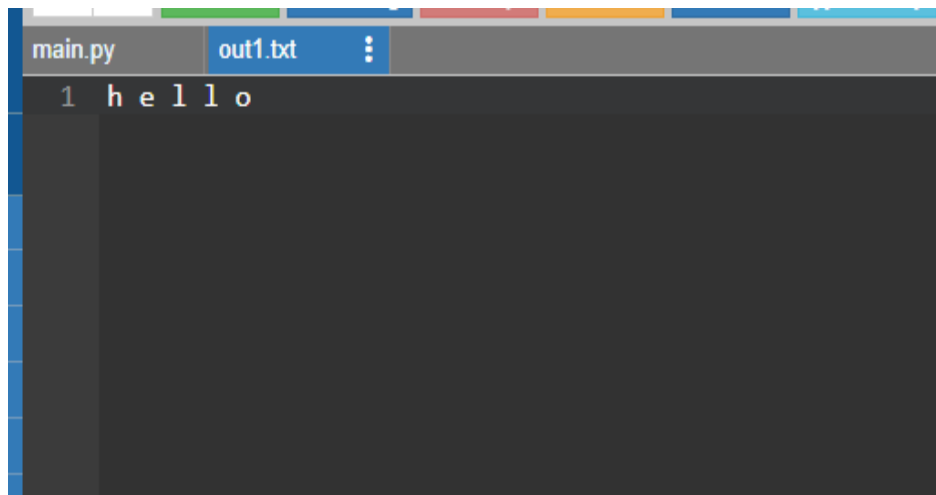

1. Python Program to Count the Number of Blank Spaces in a Text File

```
fname = input("Enter file name: ")
```

```
k = 0
```

```
with open(fname, 'r') as f:
```

```
for line in f:
    words = line.split()
    for i in words:
        for letter in i:
            if(letter.isspace):
                k=k+1
print("Occurrences of blank spaces:")
print(k)
```

The screenshot shows a code editor with two tabs: 'main.py' and 'out1.txt'. The 'main.py' tab is active, displaying a Python script. The script iterates over lines in a file 'f', splits each line into words, and then iterates over each word to count the number of blank spaces. The output is printed as 'Occurrences of blank spaces:' followed by the count 'k'. The 'out1.txt' tab shows the output of the script, which is '1 h e l l o'.

```
main.py out1.txt
1 h e l l o
```
